Job Title: Video Analyst – Traffic Survey Projects (Enumerator)

Job Summary:
Join our dynamic team as a **Video Analyst**, where you'll leverage your analytical skills to support traffic survey projects. This role blends office-based video analysis with occasional on-site exposure, ideal for engineering students looking to apply their technical and observational abilities in real-world transport studies.

Key Responsibilities:

- Analyze traffic videos to classify and document vehicle movements using project-specific software/tools.

- Accurately log traffic data by identifying patterns, categories, and anomalies (complete data analysis).

- Ensure timely and high-quality data reporting & interpretation in coordination with the central team.

- Provide regular updates on progress and flag inconsistencies or issues for correction.

- Maintain documentation of work done, including logs, reports, and validation sheets.

Key Focus Areas:

- **Video Analysis & Data Logging**: Reviewing and interpreting recorded footage to extract relevant traffic data.

- **Team Coordination**: Collaborate with other analysts and field staff to ensure accuracy and consistency across projects.

Who Can Apply:

- **Qualification**: BE/BTech/ MCA/ BCA/ BSc

- **Technical Skills**:

  o Basic knowledge of MS Excel.

  o Comfort with digital tools and handling video footage

- **Personal Attributes**:

  o Attention to detail and a methodical approach
